Equation (45) should read

$$\bar{\chi}^e(\omega, \epsilon) = 3 \sum_{i \neq 0} \frac{(\epsilon \cdot \hat{\xi}_i)^2}{|\mathbf{p}| |\hat{\xi}_i|^2} \text{Im} [e^{2i|\mathbf{p}| |\hat{\xi}_i|} f_i^e(2|\mathbf{p}|)]. \quad (45)$$

This does not affect the order of magnitude estimation of Eq. (45) or any of the results.
