≈ 1050

Deutsches Krebsforschungszentrum, Bibliothek

≈ 3000

JOIN²: Open for new partners!

Online for ≈ 20.000 staff members

+ ≈ 5000 visiting scientists

(≈ 310.000 records, ≈ 30.000 OpenAccess + 150.000 authorities)

JuSER ranked global No.6 of all German repositories in OARR 2015

≈ 300 + 1000

≈ 9000

Installations

The image shows four separate web browser windows side-by-side, each displaying a different academic repository or institutional database system.

- RWTH AACHEN:** Shows a search results page for 204,021 records, with filters for fields like any field, author, title, and subject.
- IMPULSE:** Shows a search results page for 137,075 records, with filters for any field, author, title, and subject.
- GSI Repository:** Shows a search results page for 75,794 records, with filters for any field, author, title, and subject.
- PUBDB:** Shows a search results page for 1,000,000 records, with filters for any field, author, title, and subject.

Largest productive invenio installation in Germany

Individual instances, powered by the partners and their IT

Weboutput — CMS

The image shows two screenshots of the Weboutput Content Management System (CMS) interface.

- Left Screenshot:** Displays a search results page for "JuSER" publications. It shows a list of 13 records, each with details like title, author, and abstract. The interface includes filters for fields like any field, author, title, and subject.
- Right Screenshot:** Displays a search results page for "PHOTON SCIENCE". It shows a list of 2014 publications, each with details like title, author, and abstract. The interface includes filters for fields like any field, author, title, and subject.

Integrate: think database + CMS

Publication lists need data as detailed as for evaluations...

(aid, cid, fai pof, pub, sid, typ ...)

Report No.: FZJ-2012-00157

Abstract: Corticobasal syndrome (CBS) is a rare neurodegenerative disorder characterized by a progressive and asymmetric manifestation of cortical and basal-ganglia symptoms of different origin. The spatiotemporal dynamics of cerebral atrophy in CBS is hardly known. This study aimed to longitudinally quantify the individual dynamics of brain volume changes in patients with CBS as compared

Contributing Institute(s):
1. → Strukturelle und funktionelle Organisation des Gehirns (INM-1)
2. → Zentralbibliothek (ZB)

Research Program(s):
1. → 332 - Imaging the Living Brain (POF2-332) (Gesundheit)

Appears in the scientific report → 2012

Database coverage:

JOIN²

Part II: What is  n²

Just anOther Invenio iNstallation to join

JOIN² strives to deliver a publication database that

- > is centred around **scientists** needs (e. g. reusable citations, private areas)
- > makes **achievements visible** (e. g. by integrating with other systems)
- > is **easy to use**, while ensuring a **high data quality**
- > requires a **small footprint** (for operation and curation)
- > is adoptable to local needs, while enabling **data exchange**
- > allows progress reporting

Every **unwritten** line of **code** is a **good** line of code.

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 9

Digital Library Software

The flexibility and performance of **INVENIO** make it a comprehensive solution for [...] document repositories [...] to **large sizes** (several millions of records).

- > Based on **Marc Bibliographic** (international standard)
- > **JOIN²**: Workflow (privilege escalation)
- > **JOIN²**: Marc-**Authority** to normalize data
 - bibliographic entries (e. g. Journals)
 - institutes (Predecessors, successors, tops, virtuals...)
 - authors (also for ATLAS...)
 - grants (HGF aka POF, EU, DFG, BMBF...)
 - statistic keys (e. g. for evaluation)
 - vocabulary (e. g. licences, keywords)

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 10

JOIN²— Main features

- > Import interfaces (ease up input, improve data quality)
- > Exports to BibTeX/EndNote/RIS (Integrate with citations management)
- > Institute collections (collect and share documents)
- > Handle full texts and small data (local and OpenAccess, OpenAIRE  Validated)
- > Normalize as much as possible (Key: Authorities)
 - Authors (tell apart Meier and Meier)
 - Institutes
 - Journals
 - Projects (POF, EU, ...)
 - ...

...Users don't need to care about technical details ...

Alexander Wagner, for JOIN² | DZNE | Bonn, 25.09.2015 | Page 11

Collections

- > Publicationsdatabase
- > Documents in Print:
 - approved by institutes editor
 - not yet checked by the library
 - e. g. papers “just available Online” (missing bibliographic data e. g. pages, volume)
 - already visible on institutes web pages
- > OpenAccess repository (OpenAIRE  Validated)
- > Institute Collections:
 - Institutes private workspace
 - e. g. drafts, collected literature, journal clubs ...
 - Access for members of the institue only
- > Authorities

Note: on Google nobody drills down first...

Alexander Wagner, for JOIN² | DZNE | Bonn, 25.09.2015 | Page 12

What are Authority records?

- > Reasons for a publication database:
 - 1 Visibility (includes search engines, OpenAIRE, BASE...)
 - 2 Publication lists (Web, reports, PR)
 - 3 Document collections (incl. private areas)
 - 4 Search & Browse (via database homepage)
 - 5 Reporting (HGF, EU, Funders...)
- > Authorities:
 - unify and normalize spelling (still, names are but sound and smoke...)
 - allow for “exact matches” (based on unique IDs)

Authorities are the enabling infrastructure

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 13

Institute Collections

JOIN² can hold documents beyond own publications

- > webbased literature management
- > document exchange at the institutes
- > centralized collection of papers
- > easy export to formatting tools (BibTeX, EndNote, RIS)
- > commenting (individual and in group)

Institute collections

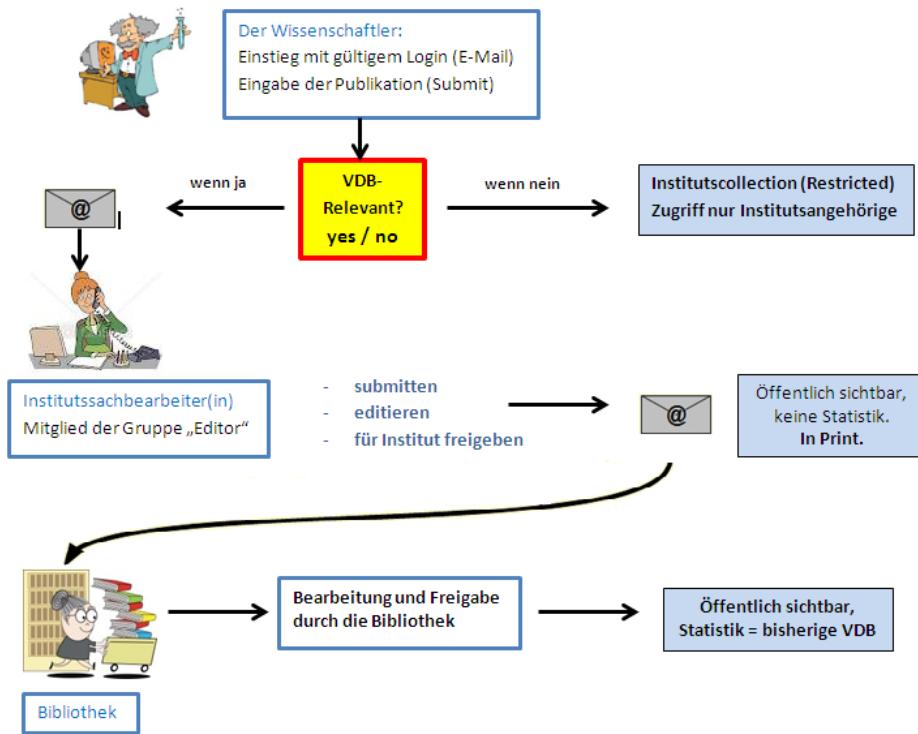

- > require login
- > Non-VDB items do not show up on the webpage
- > are private to the institute

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 14

Three step Workflow

JOIN².

Part III: The ² in

Does and Don'ts

> JOIN² does offer

- Data infrastructure ([required authorities](#))
- Code infrastructure ([OpenSource](#))
- Shared development of improvements ([Combined resources](#))
- [Community](#) based support
- [Non-Profit / Non-Commercial](#) approach

> JOIN² does not offer

- Commercial support
- Development upon request
- Service contracts

JOIN² is a GNU based [community](#) project

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 21

Requirements for Partners

1 Institutional:

- wish, to join and be a [partner](#)
- will, to contribute and adopt ([we will find something suitable...](#))
- based upon GNU public licence v2 or later

2 Technical:

- run own server ([Linux, FreeBSD](#))
- install locally
- migrate old system ([if necessary](#))
- git:  [GitHub](#), issue tracking
- python
- CSS ([or a webdesigner at hand](#))
- JavaScript, HTML, XML ([helpful](#))

JOIN² uses shared infrastructures

Alexander Wagner, *for JOIN²* | DZNE | Bonn, 25.09.2015 | Page 22

Code repositories @ JOIN²

Challenge

same code, consistent on different instances

- > git: [invenio](#) ( GitHub)
 - base system
- > git: [join2](#) ( GitHub, currently private)
 - JOIN² overlay
 - setup routines for roll-out (e. g. collections, roles, doctypes...)
 - configuration scripts and public configurations
- > git: [join2-privat](#) (centrally kept at DESY)
 - instances private configs (e. g. containing mail addresses)
 - non-publicly shareable code

Alexander Wagner, for JOIN² | DZNE | Bonn, 25.09.2015 | Page 23

InstallInvenio

InstallInvenio

handles the gits and sets up the instance at each partner in the proper layout including all global (JOIN²) and local adoptions.

- > assumes an **INVENIO**-ready server (dependencies, database exists)
- > sets up from scratch or to a given point
- > compiles and installs **INVENIO**-src
- > applies JOIN² overlay
- > applies global and local customizations
- > procedures based upon GUI functionality
- > no need to mouse click in the GUI
- > enables desaster recovery
- > allows setup of an identical test environment

Alexander Wagner, for JOIN² | DZNE | Bonn, 25.09.2015 | Page 24

Local Adoptions

- > Hook up with local login system
- > Generate local authority records ([people](#), [grants](#), [institutes](#))
- > Adopt CSS to reflect local requirements
- > Load migrated data

JOIN² will offer help to do it

Alexander Wagner, [for JOIN²](#) | DZNE | Bonn, 25.09.2015 | Page 25
