# Just anOther Invenio iNstallation to join

**JOIN<sup>2</sup>** strives to deliver a publication database that

- > is centred around **scientists** needs (e. g. reusable citations, private areas)
- > makes **achievements visible** (e. g. by integrating with other systems)
- > is **easy to use**, while ensuring a **high data quality**
- > requires a **small footprint** (for operation and curation)
- > is adoptable to local needs, while enabling **data exchange**
- > allows progress reporting

Every **unwritten** line of **code** is a **good** line of code.

## Preface

As a **community** we are slower as all partners need to adopt.

Invenio Upgrades applied:

- > 1.0 → 1.1 (checking for API changes)
- > 1.1 → 1.1.3 → 1.1.4 → 1.1.5 → 1.1.6 (easy)
- > starting preparation of 1.2 (API changes ⇒ will take long)

Complex requests require some **JOIN<sup>2</sup>** code.  
API changes delay roll-out.
