

The usages of JOIN2 authority records

Robert Thiele, Katrin Große
INVENIO) User Group Workshop 2017
Garching, 22/03/2017

<https://bib-pubdb1.desy.de/record/318763>

The Join² project: partners

The image displays a grid of 12 screenshots illustrating various digital library and publication management systems. The systems shown include:

- ub RWTH AACHEN UNIVERSITY**: A search interface for RWTH Aachen University publications.
- RWTH Publications**: A search interface for RWTH Aachen University publications.
- JuSER**: A search interface for JuSER publications.
- PUBDB DESY Publication Database**: A search interface for DESY publications.
- MLZ Heinz Maier-Leibnitz Zentrum**: A search interface for Heinz Maier-Leibnitz Zentrum publications.
- GSI Repository**: A search interface for GSI publications.
- DESY**: A logo for the German Electron Synchrotron.
- PUBDB**: A search interface for DESY publications.
- HEILMUTHZ ASSOCIATION**: A logo for the Helmholtz Association.
- DKFZ German Cancer Research Center**: A search interface for DKFZ publications.
- DKFZ**: A logo for the German Cancer Research Center.

Each screenshot shows a search bar, navigation menus, and a list of search results or facets for navigating the database. The interfaces are designed to be user-friendly and professional, reflecting the nature of scientific and academic research.

- Typical authority record as example of our periodicals
- Based on German periodical database (DNB) of national library
- We use identifiers: further content is searchable, e.g. recent publications

- Enriched with statistically information's, like "listed by SCOPUS", etc.
- Base for search, e.g. statistic keys per year, per POF, per grants, etc.

Previous Next

Overview of POF programs, groups, grants, experiments or conferences:

- Per statistic keys or publication types
- Different coverages and full searchable and customizable

Short Summary

- Retrospective statistics possible, e.g. transition POF2 -> POF3 period
- High quality in meta data via DOI import
- Complex searches: easy to use
- Evaluation also for groups, grants, experiments or conferences possible

- Statistics for Open Access planned
- The POF4 period is coming!

OpenAIRE publications – done

Kerndatensatzforschung ?

‘Kerndatensatz Forschung’ for research information & reporting

Starting at January 1st 2016 the Kerndatensatz Forschung was introduced for the standardisation in the field of research information in Germany on a voluntary base:

<http://www.kerndatensatz-forschung.de/>

with objects: Person, grant, Phd program, patent, publication, research infrastructure

‘Kerndatensatz Forschung’ for research information & reporting

http://www.kerndatensatz-forschung.de/version1/technisches_datenmodell/xsd/kdsf-basis.xsd

```

oriented on the Common European Research Information Format – CERIF : <http://eurocris.org/cerif/main-features-cerif>

Can we deliver to a currents research information system in our organizations?

As small units we cannot extend our systems to a full CRIS or organize change processes to adapt organizational structures to reporting structures belong the Kerndatensatz Forschung.

Can we deliver to object fields like publication or patent with our existing JOIN2 instances within our own organizations?

Can we deliver to a currents research information system in our organizations?

We have

- about 134000 authority records for personnel, grants, research infrastructure, departments, e-journals (part 1)
=> so we can build the necessary KDSF aggregations
- via import and enhancement we have most of the recommended identifier DOI, ORCID, INSPIRE-ID, PUBMED-ID, ...
- we could re-used programs of the Helmholtz/POF statistic tool

Can we deliver to a currents research information system in our organizations?

The collage consists of several overlapping and adjacent screenshots from various research information systems:

- Top Left:** A screenshot from a system labeled "PRIVAT" showing a profile for "Große, Katrin". It includes sections for "Institutes", "e-Mail", "ID ORCID", and "PUBLICATIONS IN PRINT".
- Top Center:** A screenshot from "Experimentelle Hadronodynamik (IKP-2)" showing a publication record for "Conference Presentation (Invited)" by Rathmann, F. titled "Search for permanent electric dipole moment Flavour 2015 New Physics at high Energy and Hg".
- Top Right:** A screenshot from "FS-CFEL-2 (CFEL-UFOX)" showing a publication record for "Accelerators Validating Antimatter physics" by GSI HELMHOLTZZENTRUM FUER SCHWERIONENFORSCHUNG GmbH.
- Middle Left:** A screenshot from "ARD Accelerator Research and Development" showing a grant record for "Study of Pion-induced In-medium Production and Propagation of Str..." coordinated by Matulewicz, T.
- Middle Center:** A screenshot from "SFB TRR 55: Hadronenphysik mit Gitter-QCD" showing a grant record for "Hadronenphysik mit Gitter-QCD" coordinated by Frenner, Andreas.
- Middle Right:** A screenshot from the "OpenAIRE" platform showing a grant record for "Accelerators Validating Antimatter physics" coordinated by GSI HELMHOLTZZENTRUM FUER SCHWERIONENFORSCHUNG GmbH.
- Bottom Left:** A screenshot from "Collaboration FAIR: R3B (R3B@FAIR)" showing a grant record for "FAIR Facility for Antiproton and Ion Research in Europe GmbH".
- Bottom Center:** A screenshot from "Helmholtz Research School of Biophysics" showing a grant record for "HRS-BioSoft-20161118" coordinated by Maas, Frank.
- Bottom Right:** A screenshot from the "DESY Publication Database" showing a grant record for "Cosmic Matter in the Laboratory" coordinated by Maas, Frank.

Can we deliver to a currents research information system in our organizations?

Some special fields are problematic for our implementation:

- peer-reviewed (missing computer operational definition)
- separation paper-online publication (contradiction to our statistics tool)
- some specialized values and specifications are not really relevant for our research fields (e.g. bibliography), because of different culture in publication background

So we have to make some compromises.

Main reason is that for our scientists the entry template must be usable and understandable without huge handbooks or trainings

One of the next steps

One of the next steps in JOIN2 is to implement a CERIF export format as one of our output formats for the coming current research information systems in our organizations, which are not decided yet.

If the CERIF information will be make open in our instances is not decided also.

THANK YOU.
