The project openCost: Automated, standardized delivery and open provision of publication costs and publishing agreements

To foster fairness in science we are creating a technical infrastructure that allows us to comprehensively record all costs involved in scholarly publishing and subsequently make them freely accessible by means of standardized interfaces. This is supposed to enable cost transparency on an institutional, national and international level.

> ... will henceforth inform not only about reading rights, but also publication rights and options of each individual institution.
> ... as the central platform for communicating OA information to researchers.
> ... with cost information, journal category filter & output, display of memberships & transformation contracts with ESAC ID, adjustments of the EZB-REST-API.

027.7 : Zeitschrift für Bibliothekskultur = Journal for Library Culture (2013 - 2020)

Online Availability: Fulltext freely available
To the fulltexts: Vol. 1, Iss. 1 (2013) – Vol. 7, Iss. 1 (2020)

General information on the online edition:
Title: 027.7 : Zeitschrift für Bibliothekskultur = Journal for Library Culture (2013 - 2020)
Latest articles: Newsfeed
Publisher / Provider: Universitätsbibliothek Basel
Search publishers open access policy in SHERPA/RoMEO
Subject(s): Librarianship and Information Science
Category: Indexed in DOAJ | Journal without APC
Keyword(s): Allgemeines Bibliothekswesen
Language(s): German
E-ISSN(s): 2296-0597
ZDB-Number: 2709330-X
Fulltext online since: Jg. 1, H. 1 (2013)
Fulltext online until: Jg. 7, H. 1 (2020)
Homepage(s): <https://zenodo.org/communities/0277/?page=1&size=20>
Type of Appearance: Fulltext, online only
Pricetype: free of charge

Perspective: Extension of the openCost metadata schema to costs related to the publication of research data

The publication of data is becoming increasingly important and raises many questions in the publication process, and related costs also require a transparent, standardized approach right from the start. This calls for close collaboration with the community early on to identify relevant parameters.
