Gold OA: Sharp APC increase in 2022 after publication peak in 2021

Hybrid: Steady price increases along inflation rate

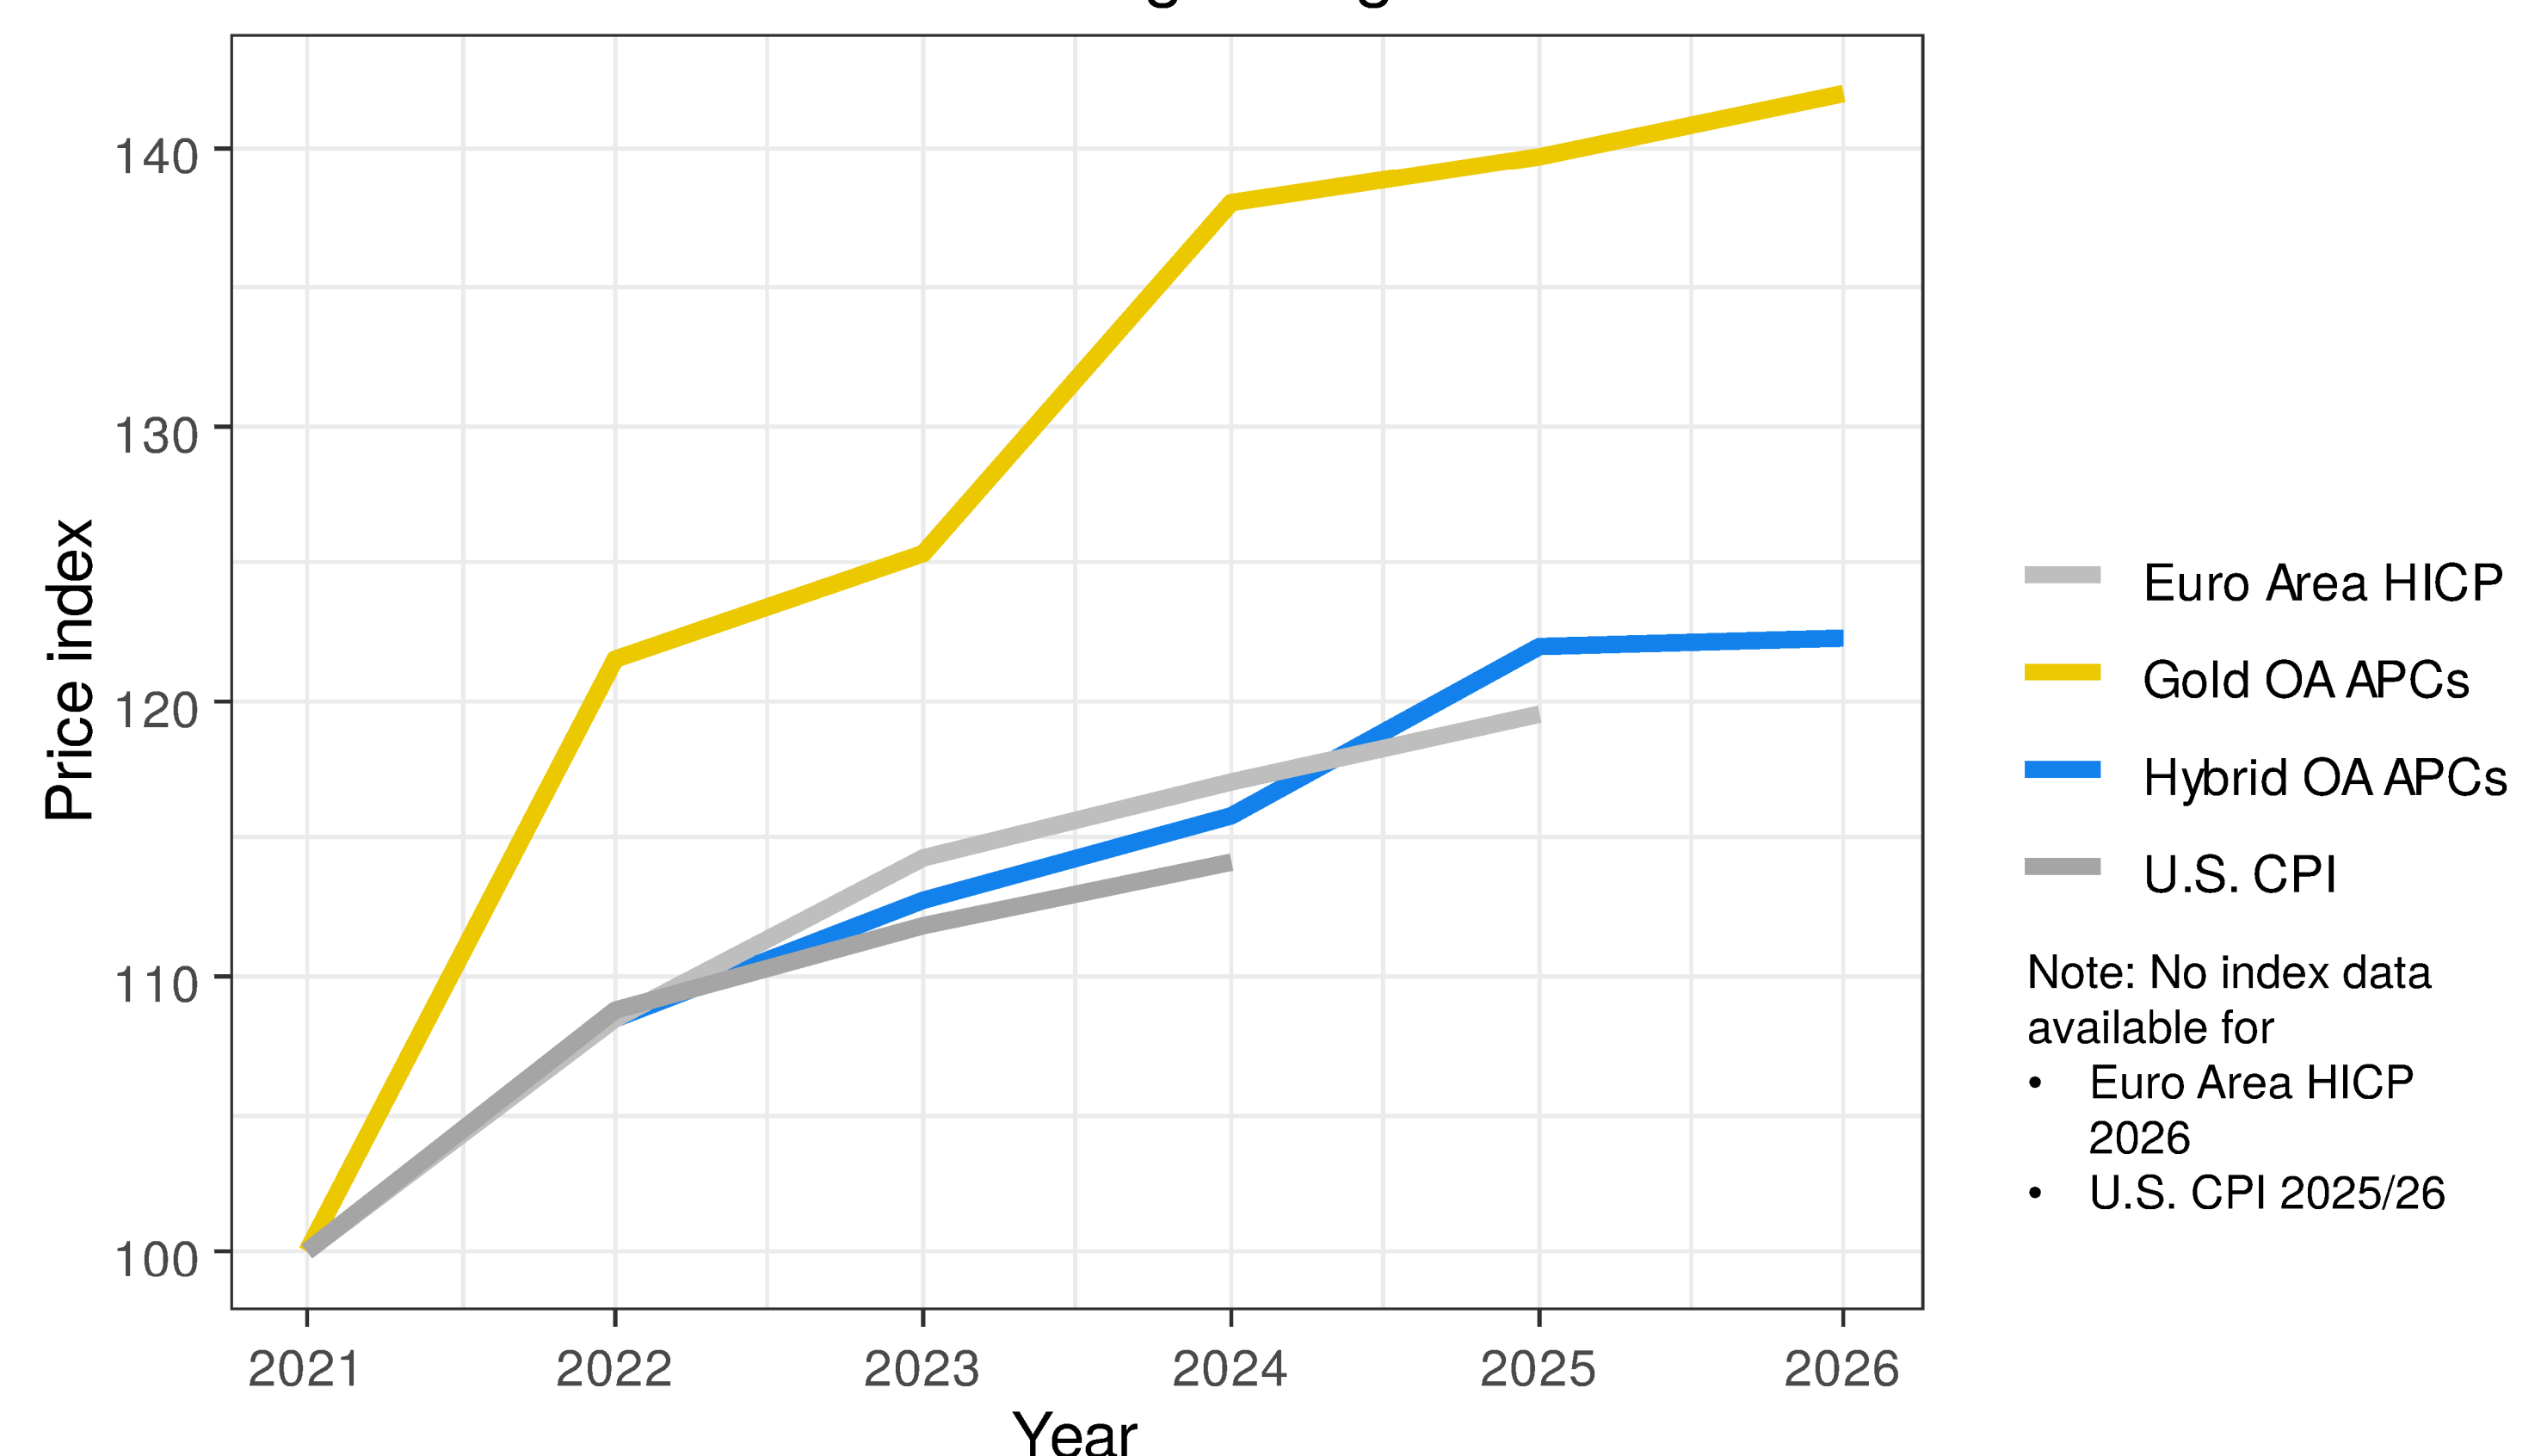

Publication output and zero APCs matter

Mean APCs, (un)weighted by publication output

Rise in gold APCs exceeds inflation by far

Price Index: Article Processing Charges vs. Consumer Prices

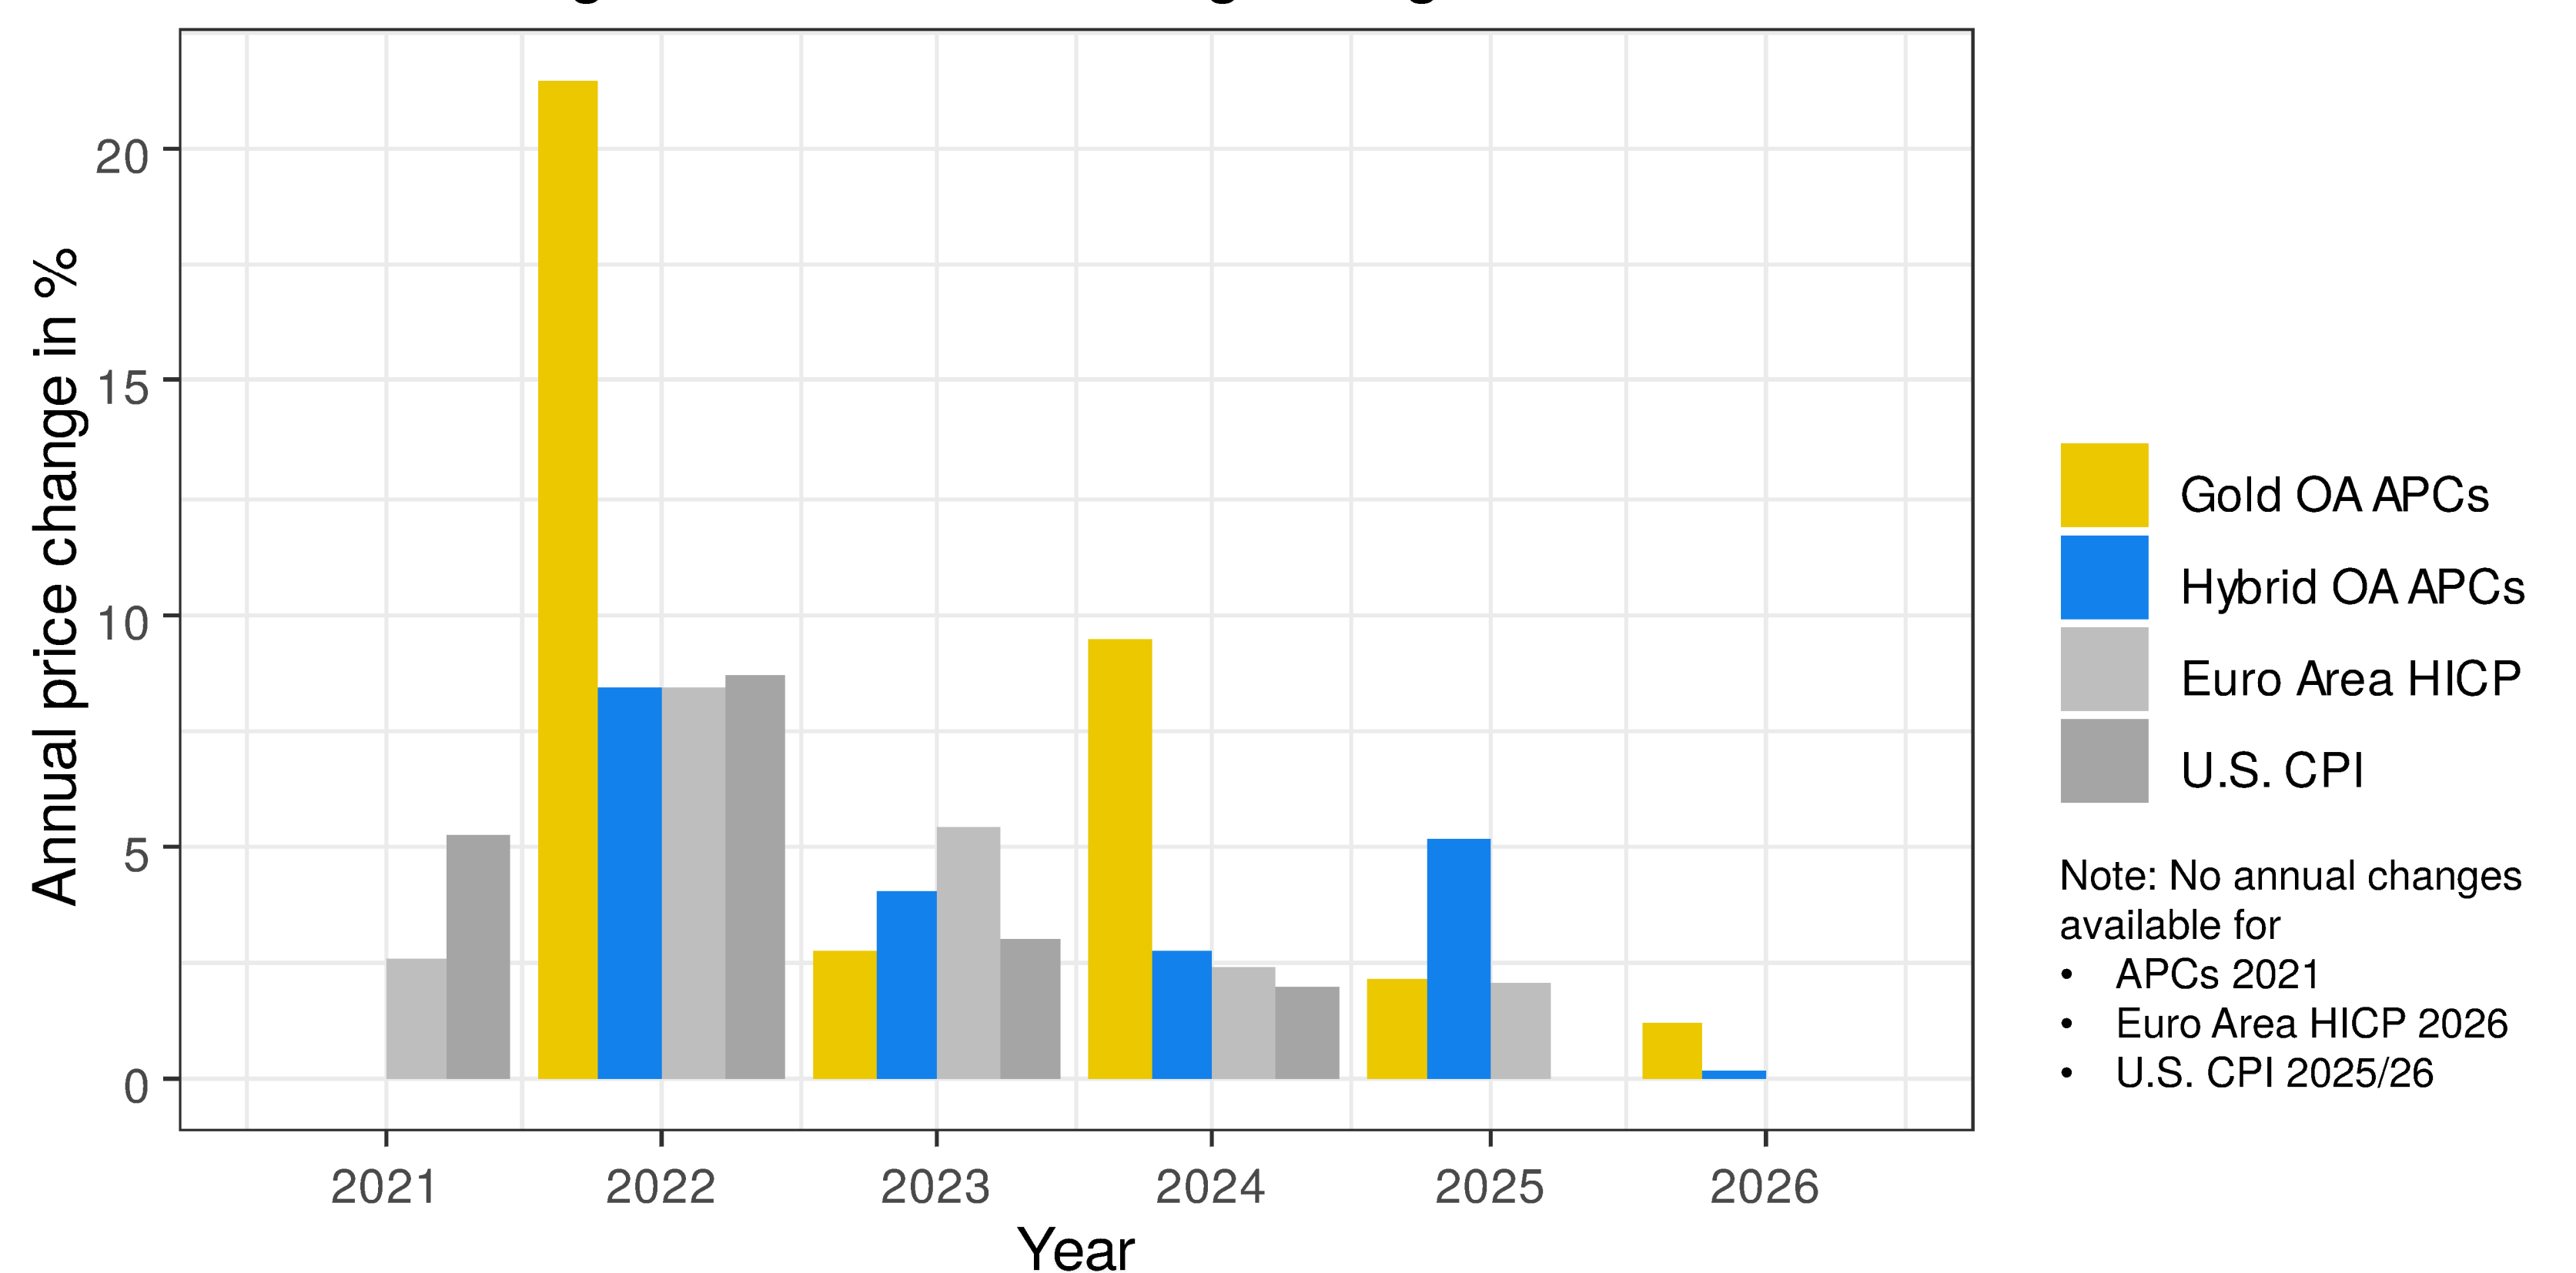

Method:

- Calculation of a Laspeyres/Paasche-type price index
- Publication output per journal 2021–2024 as constant item weights
- Base year: 2021
- For two sectors: gold OA and hybrid OA
- Price index and period-over-period changes
- Comparison with the Euro Area Harmonised Index of Consumer Prices (HICP) and the U.S. Consumer Price Index (CPI), source: Eurostat

Hybrid APCs change equally to consumer prices

Percent changes: Article Processing Charges vs. Consumer Prices
